MEMO COVERSHEET & CERTIFICATION

One Packet per Memo · LAW 575 · Spring 2027

Everything your memo carries besides the memo itself lives in this one packet. The coversheet pages attach at the front of your document at every stage; the acknowledgment-and-certification page attaches as your memo's final page. Fill the identity block once; complete the section matching the stage you are submitting at; and complete the last page fresh with the memo and with any cure.

MEMO IDENTITY · complete once

Name: _____ Unit: _____ Problem: _____

Circle members: _____

STAGE 1 · CIRCLE DRAFT · due on your draft date

Draft posted to circle on (the start of the session before your letters date): _____
Word count: _____

☐ This is a complete draft: every issue in CREAC form, a recommendation reached.

☐ One question I most want my circle's reaction to:

_____

STAGE 2 · FINAL SUBMISSION · due on your memo due date

Submitted on: _____ Final word count, body text only (1,000-1,500): _____

☐ Revised in response to the circle workshop. One line on the largest change made:

_____

☐ Feedback letters attached: the drafts assigned to me in thread order (one in a pair; a late writer writes for the first two drafts). Letters written for:

_____

☐ My feedback letters were written without generative AI.

☐ AI acknowledgment completed on the memo's last page: Statement 1 with its link, export, or short description, or Statement 2.

☐ Certification signed on the memo's last page.

☐ Self-review substituted (circle of one only: the Circle Feedback Letter completed on my own draft).

STAGE 3 · CURE RESUBMISSION · within one week of the cure notice

Responding to cure notice dated: _____ Resubmitted on: _____ (A memo is accepted up to one week late; if it misses items, its cure is due a week from the notice.)

Rubric items the notice marked MISSED (circle all that apply): 1 2 3 4 5 6 7 8

☐ Each marked item is addressed. Reframing an issue is allowed where a marked item requires it; if you reframed, say what and why:

_____

☐ For each marked item, the page or section of this revision that responds to it:

_____

☐ Certification re-signed for the revised memo.

Cures come directly to me, not through your circle. A memo that needs a cure can pass but is not eligible for Honors Pass (see the Circle Guide).

LAST PAGE OF YOUR MEMO · ACKNOWLEDGMENT & CERTIFICATION · the memo and any cure, not circle drafts

Complete Statement 1 or Statement 2, never both and never neither. Omitting it inadvertently is a rubric miss and goes to the cure cycle; misrepresenting your use of AI is an Honor Code matter; the certification is rubric item 7: a memo without it, or with it unsigned, misses item 7 and goes to the cure cycle, like an omitted acknowledgment.

Statement 1: I used generative AI

Tools and versions: _____

What I used them for (for example, outlining, prose polish, stress-testing my counterargument):

_____

Link to the engagement (or, where the tool gives none, a dated export or short description):

_____

How I verified its outputs before adopting them (what you read, checked, or tested yourself):

_____

Example of verification language done well: "I read every case cited in the memo in the assigned pages myself; where the tool characterized a holding, I confirmed the characterization against the source text before adopting any language."

Statement 2: I did not use generative AI

I did not use generative AI tools in any part of this memo. Initials: _____

CERTIFICATION · sign with the memo and any cure

I have personally read each cited authority, or the relevant portion, and confirmed that it supports the specific proposition for which it is cited. Where I used AI tools in any part of this memo, I understand that this certification, not the tool, is my representation to the reader.

Signature _____ Printed name _____

Problem _____ Date _____

An honest misreading of something you actually read is a good-faith error and is what the cure cycle is for. Fabricating authority, or citing a source you never read, blocks a pass until resolved with me and, where required, through the Honor Code process, independent of every other requirement.

Course documents

Each link opens the current version: the Circle Guide from the shared course folder, every other document from the course website. The syllabus is the master document and controls where documents differ.

Syllabus. The master document; it controls where documents differ.

Circle Guide. How the portfolio works, from sign-up to circles, the Memo Rubric, the cure cycle, the CREAC template, and the Circle Letter form.

Memo Coversheet & Certification (this document). The cover materials required with every memo.

Tech Digest Project. Instructions and deadlines, from the first session to the reflection due February 1.

Annotation Guide. What goes in an annotation set.

SIAR Module. The Session 6 module and the quiz instructions.

Course website. The course home page: next class, deadlines, and links to every course document; the Unit Circles page is linked from it.

Shared course folder. Where the Circle Guide lives, always the current version.

Canvas course. Modules, assignments, sign-ups, the Session Make-Up Board, and recordings.

DOCUMENT HISTORY

OPEN IN v8.2 (unresolved items; each resolves in a numbered revision):

- Canvas submission points and the Honor Code link: set at deployment.

v8.2 · Oct 19, 2026 · Course documents: every document but the Circle Guide now opens as a PDF from the course website; links updated; a stray link in the appendix removed; no rule changed.

Earlier versions are kept by the professor; the version above is the one in force.
